# Charting the Course of Innovation: A Startup Analysis

Project Based Experiential Learning Program

Charting the Course of Innovation: A Startup Analysis

Starting a new company can be an exciting and rewarding experience, but it also requires careful planning and analysis to ensure that the business is viable and successful. There are several key areas that you should focus on when conducting a startup company analysis. Conducting a thorough analysis of these areas can help you identify potential challenges and opportunities, and develop strategies to address them. It is also important to regularly review and update your analysis as the business progresses, in order to adapt to changing market conditions.

Technical Architecture:
Project Flow

To accomplish this, we have to complete all the activities listed below,

- Define Problem / Problem Understanding
    - o Specify the business problem
    - o Business requirements
    - o Literature Survey
    - o Social or Business Impact.
- Data Collection & Extraction from Database
    - o Collect the dataset,
    - o   Storing Data in DB
    - o Perform SQL Operations
    - o Connect DB with Tableau
- Data Preparation
    - o Prepare the Data for Visualization
- Data Visualizations
    - o Number of Unique Visualizations
- Dashboard
    - o Responsive and Design of Dashboard
- Story
    - o Number of Scenes of Story
- Performance Testing
    - o Amount of Data Rendered to DB '
    - o Utilization of Data Filters
    - o Number of Calculation Fields
    - o Number of Visualizations/ Graphs
- Web Integration
    - o Dashboard and Story embed with UI With Flask
- Project Demonstration & Documentation
    - o Record explanation Video for project end to end solution
    - o Project Documentation-Step by step project development procedure

Milestone 1: Define Problem / Problem Understanding

Activity 1: Specify the business problem

Refer Project Description

Activity 2: Business requirements

The business requirements for analyzing the performance and efficiency of startups in India include identifying KPIs, comparing performance across different industries and states, identifying patterns and trends over time, identifying affecting factors, creating interactive dashboards and reports, identifying areas for improvement, making data-driven decisions, comparing to the industry average and creating forecasting models for future performance. The ultimate goal is to gain insights and improve performance through data visualization techniques.

Activity 3: Literature Survey (Student Will Write)

A literature survey is a method of researching existing literature and studies related to a specific topic. In analyzing the performance and efficiency of startups in India, a literature survey would involve reviewing studies and articles published on the topic of hotel performance and efficiency, as well as studies specific to startups approved by the Indian government. The literature survey would include sources such as academic journals, industry reports, and online articles. It would aim to identify key performance indicators (KPIs) and metrics that are commonly used to measure startup culture and its trend, as well as any best practices or strategies that have been identified for improving performance. The literature survey would also explore any existing research on startups in India of different domains specifically and would aim to identify any unique challenges or opportunities that the hotel chain faces in terms of performance and efficiency

Activity 4: Social or Business Impact.

Social Impact: Startups are the boost for any country. By analysing the startups and number of startups coming every year and industries that are seeing the boom, may somebody with the dilemma to start or not start can start his/her own company and become successful.

Business Model/Impact: Can make this visualization application available for people, for more insights and ideas can ask for payment and also can give these insights to investors and banks to make the understand and help in the sense of investing.

Milestone 2: Data Collection & Extraction from Database

Data collection is the process of gathering and measuring information on variables of interest, in an established systematic fashion that enables one to answer stated research questions, test hypotheses, evaluate outcomes and generate insights from the data.

Activity 1: Downloading the dataset

Please use the link to download the dataset: Link

Activity 1.1: Understand the data

Data contains all the meta information regarding the columns described in the CSV files

Column Description of the Dataset:

1. Year: This is the year startups have to be registered and recognised by the Indian Government

2. State: This is the state that companies are registered

3. Industry: This is the industry or domain in which the startup in the company has been registered.

4. Count: Number of companies registered in that year, state and Industry.

Activity 2: Storing Data in DB & Perform SQL Operations

Explanation video link:
https://drive.google.com/file/d/1tIzKYS1hICw2gaM8E7eS4AXOG3Bvl34e/view?usp=share_link

Activity 3: Connect DB with Tableau

Explanation video link:
https://drive.google.com/file/d/13mmQD9NUte4KyBvmpZUDmKK7aqE9ujPn/view?usp=share_link

Milestone 3: Data Preparation

Activity 1: Prepare the Data for Visualization

Preparing the data for visualization involves cleaning the data to remove irrelevant or missing data, transforming the data into a format that can be easily visualized, exploring the data to identify patterns and trends, filtering the data to focus on specific subsets of data, preparing the data for visualization software, and ensuring the data is accurate and complete. This process helps to make the data easily understandable and ready for creating visualizations to gain insights into performance and efficiency.

Explanation video link 1:
https://drive.google.com/file/d/1uBHKvmJHxc4uQAOib7Leago2a6VPhaZN/view?usp=sharing

Reference Video one Data Pre Processing (Different Project for to know how you can do):

Milestone 4: Data Visualization

Data visualization is the process of creating graphical representations of data to help people understand and explore the information. The goal of data visualization is to make complex data sets more accessible, intuitive, and easier to interpret. By using visual elements such as charts, graphs, and maps, data visualizations can help people quickly identify patterns, trends, and outliers in the data.

Activity 1: Number of Unique Visualizations

The number of unique visualizations that can be created with a given dataset. Some common types of visualizations that can be used to analyze the performance and efficiency of Radisson Hotels include bar charts, line charts, heat maps, scatter plots, pie charts, Maps etc. These visualizations can be used to compare performance, track changes over time, show distribution, relationships between variables, breakdown of revenue and customer demographics, workload, resource allocation and location of hotels.

Activity 1.1: Number of Startups by Year

Explanation video link:

https://drive.google.com/file/d/1349VD_xGpDhA2msplCkIa1LgjEOpV2K0/view?usp=share_link

Activity 1.2: Number of Startups Industry Wise

Explanation video link:
https://drive.google.com/file/d/1QR-2NthW7UNn2AYId2BmHNeMbMZCPDhy/view?usp=share_link

Activity 1.3: Number of startups by state

Explanation video link:
https://drive.google.com/file/d/1L_yo6h2n4RoMgIBozX4XCatXiYSpVe2l/view?usp=share_link

Activity 1.4: Top 10 Industries by number of Startups

Explanation video link:
https://drive.google.com/file/d/1MAuwE_pO0UOm2a6z0aJVGESW7YGJCYzF/view?usp=share_link

Activity 1.5: Number of Startups by year and applying filers of Industry and State

Explanation video link:

https://drive.google.com/file/d/1TbHmy1ROHEagpYsw5eCU8mKGdl9307bh/view?usp=share_link

Activity 1.6: Top 10 Industries by number of Startups

Explanation video link:

https://drive.google.com/file/d/1_05SeZD0-ruD3FJSrovG1lHCKb8QqyND/view?usp=share_link

Activity 1.7: Top 10 Industries and Top 10 States of each industry

Explanation video link:

https://drive.google.com/file/d/1dVLTlUlSdBRN_645A-hNzynGkNxijuJ5/view?usp=share_link

Milestone 5: Dashboard

A dashboard is a graphical user interface (GUI) that displays information and data in an organized, easy-to-read format. Dashboards are often used to provide real-time monitoring and analysis of data and are typically designed for a specific purpose or use case. Dashboards can be used in a variety of settings, such as business, finance, manufacturing, healthcare, and many other industries. They can be used to track key performance indicators (KPIs), monitor performance metrics, and display data in the form of charts, graphs, and tables.

Activity 1- Responsive and Design of Dashboard

Once you have created views on different sheets in Tableau, you can pull them into a dashboard.

Explanation video link:

https://drive.google.com/file/d/1mRulI2ii6Xm5aS-4YIDVHCPpJSy_F1bz/view?usp=share_link

No of Startups year wise

No of Startups Industry wise

State and the total number of startups

Top 10 industries and Top 10 states of each industry

+ableau
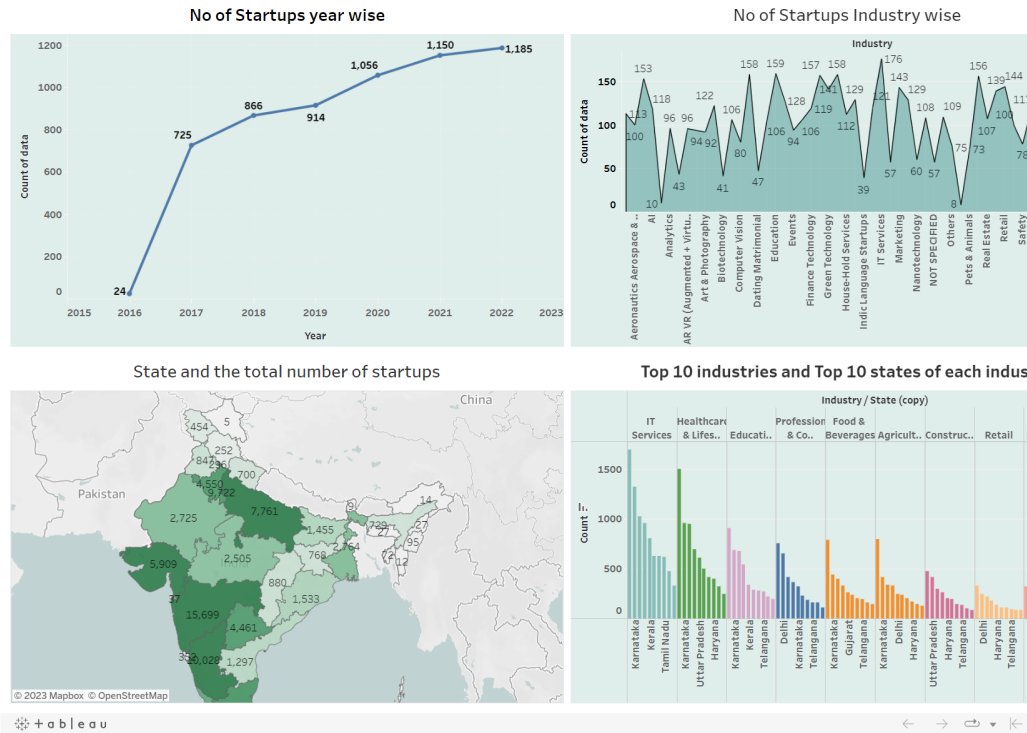

Milestone 6: Story

A data story is a way of presenting data and analysis in a narrative format, intending to make the information more engaging and easier to understand. A data story typically includes a clear introduction that sets the stage and explains the context for the data, a body that presents the data and analysis logically and systematically, and a conclusion that summarizes the key findings and highlights their implications. Data stories can be told using a variety of mediums, such as reports, presentations, interactive visualizations, and videos.

Activity 1- Number of Scenes of Story

The number of scenes in a storyboard for a data visualization analysis of the performance and efficiency of Radisson Hotels will depend on the complexity of the analysis and the specific insights that are trying to be conveyed. A storyboard is a visual representation of the data analysis process and it breaks down the analysis into a series of steps or scenes.

Explanation video link:

https://drive.google.com/file/d/1m-RxrEruqxGJrTyra2Qta4h6RCKfbI4k/view?usp=share_link
Milestone 7: Performance Testing

Activity 1: Amount of Data Rendered to DB

- The amount of data that is rendered to a database depends on the size of the dataset and the capacity of the database to store and retrieve data.

- Open the MySQL Workbench, go to the database then click to expand the tables,select the table and click on (i) button to get the information related to table such as column count,table rows etc.

SCHEMAS

🔍 Filter objects

▶ 🗄 sakila
▼ 🗄 startup

Activity 4: Number of Visualizations/ Graphs

1. Number of Startups by Year
2. Number of Startups Industry Wise
3. Number of startups by state
4. Top 10 Industries by number of startups
5. Number of Startups by year and applying filers of Industry and State
6. Top 10 Industries by number of Startups
7. Top 10 Industries and Top 10 States of each industry

Milestone 8: Web integration

Publishing helps us to track and monitor key performance metrics and to communicate results and progress. help a publisher stay informed, make better decisions, and communicate their performance to others.

Publishing dashboard and reports to tableau public

Step 1: Go to Dashboard/story, click on the share button on the top ribbon

Share via Tableau Server or Tableau Cloud   ✕

Server: https://public.tableau.com   ⌄

                                                    Connect   Cancel

Quick Connect
Tableau Cloud

Don't have a Tableau Server or Tableau Cloud account? Quickly create a Tableau Cloud site to share your work.

Create Site >>

 Give the server address of your tableau public account and click on connect.

Explanation Video:-

https://drive.google.com/file/d/1AKAk2hiVyqS3td148uHbxr-Nk-k0uxET/view?usp=sharing

Step 2: Once you click on connect it will ask you for the tableau public username and password
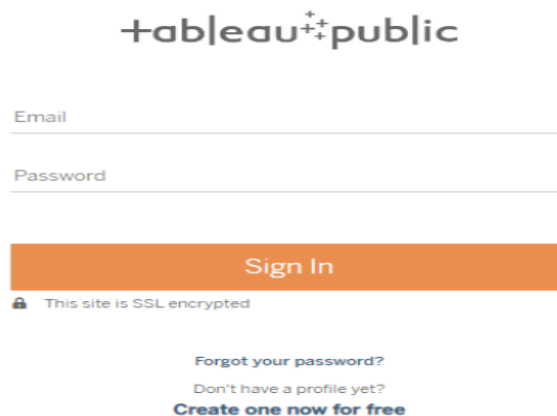

+ableau‡public

Email

Password

Sign In

🔒   This site is SSL encrypted

Forgot your password?

**Create one now for free**

Once you login into your tableau public using the credentials, the particular visualization will be published into the tableau public

Note: While publishing the visualization to the public, the respective sheet will get published when you click on the share option.

Activity 1: Embed Dashboard & Story with Web Bootstrap

Explanation video link:

https://drive.google.com/file/d/17iFidJDOnJSHMwSJxCLyuxkqZtZKil7Y/view
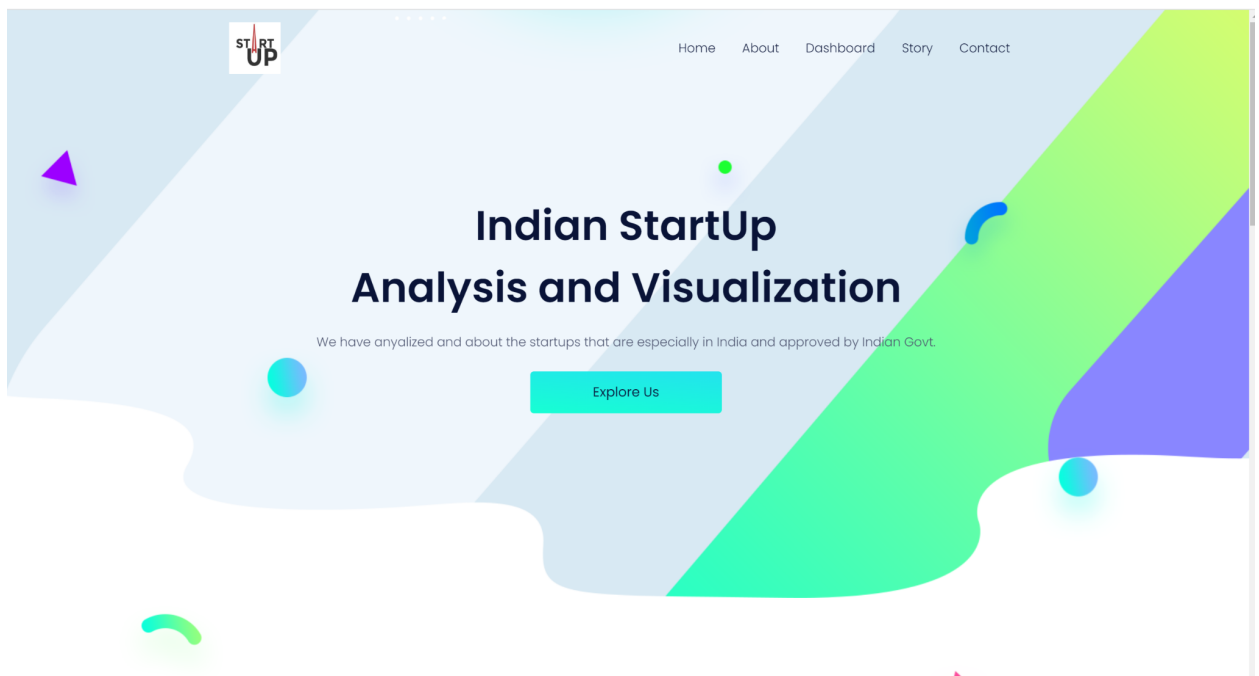

Awesome Features

Awesome Design
The Graphs aND Charts used in here for Visualization will be more understanding at a quick glance.

Easy Customize
The Dashboard that is created in the responsive and dynamic dahboard that you can use to analyze and understand more.

Saving Time
To start you startup, now need to keep hours of your time to just understand what the stage of all startups here you can understand quickly by just looking the Visualization.

Story
The Narration of data based the Visualization and analysis is super engaging.

Milestone 9: Project Demonstration & Documentation

Below mentioned deliverables to be submitted along with other deliverables

Activity 1:- Record explanation Video for the project's end-to-end solution

Activity 2:- Project Documentation-Step by step project development procedure

Create document as per the template provided
